

Fortegnelse over euforiserende stoffer optaget i FN's narkotikakonventioner

Forskelle mellem de enkelte landes nationale regler betyder, at en rejsende, der har brug for at medbringe et lægemiddel, i principippet inden afrejsen vil skulle undersøge, om det pågældende lægemiddel indeholder euforiserende stoffer, der er undergivet kontrolforanstaltninger i det land, han eller hun ønsker at rejse til. Det vil i givet fald også skulle undersøges, om det pågældende land tillader indførsel eller besiddelse af et sådant lægemiddel til medicinsk brug, og hvilken dokumentation det pågældende land kræver for det medicinske behov for lægemidlet. Den rejsende vil herefter skulle søge at indhente den påkrævede dokumentation og eventuelt få den oversat.

I FN's narkotikakonventioner, som indebærer en forpligtelse for landene til at undergive euforiserende stoffer særlige kontrolforanstaltninger, er der optaget en lang række euforiserende stoffer. Som vejledning for, hvad der i Schengen-landene og andre lande, som har trådt FN's narkotikakonventioner, betragtes som euforiserende stoffer, kan der henvises til følgende fortegnelse over euforiserende stoffer optaget i FN's narkotikakonventioner:
